

4000 SERIES

DESCRIPTION

The 4000 series is a 400mm x 170mm jaw action crusher that has the capability of crushing a full UK kerbstone in approximately 60 seconds. Instant hydraulic adjustable jaws allow output product sizes to range from 20mm up to 80mm. Dust suppression is fitted as standard, by means of fine water spray nozzles utilising standard domestic hose pressure.

These crushers are ideal for landscape gardeners, small builders and developers. They are very simple to operate and incredibly cheap to run. The 4000 series simply cannot be matched for its reliability, performance and versatility by anything else in the market. Purchasing a 4000 series for small scale crushing is a very cost-effective method of avoiding large muck away bills and bought in hardcore costs. Simply drive the crusher into position, select the desired output size, start the crusher and conveyor system and start to crush. Up and crushing in less than 5 minutes.

The 4000 series can pass through a doorway meaning back garden sites and awkward access areas can still be accessed. The 4000 series makes light work of reinforced concrete, brick, porcelain, glass and other aggregate type products.

STANDARD FEATURES

- Jaw aperture of 400mm x 170mm
- Average product size 20mm to 80mm
- Additional product sizes on request
- Hydraulic powered
- Powered by Kubota engine.
- Output can be 6-8 tonnes per hour
- No Excavator needed to load the crusher
- CE marked

DIMENSIONS

- Length: 3000mm
- Width: 775mm
- Loading Height: 1580mm
